

About the Artist – Sun Yu-li

Sun Yu-li is one of the nation's leading artists who have placed Singapore on the world map with overseas installations and exhibitions. His sculptures and paintings can be seen all over the island from The Singapore Art Museum to Dhoby Ghaut station and in countries like China, USA and England.

As a former architect, Yu-li has a rational and logical mind and has spent over 30 years studying the fundamentals of metaphysics, linguistics, topology, geometry, archaeology and philosophy. He has developed the "Universal Language" in search of the "universal truth"; a search for the original state of form.

Yu-li's art have been described as "art of the mind" and his style "an expression of abstract thought based on metaphysical principles". He has his own unique way of creating, inspired by the essence of the Universal Language: Beginning with the dot, forming a line, then progressing to a plane, and finally into volume. Just as grammar is basic and fundamental to language, Yu-li attempts to achieve the mutual communication between creator and viewer through the use of basic concepts and metaphysical moulds.

Born *China, 25th May 1948*
